EXPERIENCE

Software Developer and DevOps Intern

Mar 2023 - Oct-2023

WeeTech Solution

India

- Saw complex and manual deployment process for Web Apps, So I was guided to **build CI/CD pipelines using Bash and Python and GitHub Actions** to deploy apps on AWS, Vercel, and Render, cutting manual effort by **40%**
- Applied **Docker, Kubernetes, and Prometheus** to containerize and monitor development environments, making deployments more stable and easier to track.
- I improved my best coding practice and architecture knowledge by pairing with senior developers on the internal projects and contributed with an **optimized version Backend API's** in Core PHP & Node JS both reducing response time (**19 milliseconds**)

Software Developer (Backend Services)

Dec 2021 – Dec 2022

SkyBit Solutions

India

- Joined as an intern with limited backend knowledge in programming, so I learned **PHP, Node.js, and ASP.NET MVC** from scratch building solid foundations in **OOP and MVC** Architecture Design and developed features for internal projects, applying everything hands-on for real client requests.
- I took on more challenging backend tasks such as **Application backend architecture design, load balancing and failure case backup plans** by consistently delivering working code on internal projects which increased company productivity by **10%** and Proved reliability and improved technical skills, which directly led to my promotion as **Junior Software Developer** in the company.

Computer Science - Subject Matter Expert
